Eco-innovation for decarbonization and circularity: aligning business and policy with planetary boundaries

3rd International Workshop of the Eco-innovation Society

The Society for Eco-innovation Studies is pleased to announce its third international workshop, bringing together scholars and practitioners from economics, management, policy studies, and related fields. This event follows the successful editions held in Paris (2023, 2024), continuing the consolidation of a vibrant scholarly community on eco-innovation, circular economy, and decarbonization.

Keynote Speakers

Will McDowall
(UCL)

Fernando J. Díaz López
(HEC Paris)

Themes and Topics

We welcome papers explicitly focusing on eco-innovation (title, keywords, abstract). Contributions may use qualitative, quantitative, or mixed approaches, and multidisciplinary research is strongly encouraged. Topics of interest include (but are not limited to):

1. Eco-innovation in the transition to circularity and decarbonisation
2. Business models and eco-innovation strategies within planetary boundaries
3. Eco-innovation, eco-design, and sustainable product policies
4. Knowledge production, spillovers, and complementarities of eco-innovation
5. Eco-innovation for climate adaptation and resilience
6. Climate policy effects on eco-innovation (CBAM, ETS, carbon pricing, disaster risk management, etc.)
7. Eco-innovation in green finance (ESG, EU taxonomy, green bonds, etc.)
8. Drivers, barriers, and determinants of eco-innovation
9. Eco-innovation measurement and monitoring
10. Eco-innovation in least developed countries, inequality, and just transitions
11. Open Innovation
