THE CHALLENGES OF ECOLOGICAL TRANSITION: NORTH-SOUTH PERSPECTIVE

DEPARTMENT OF ECONOMICS, ENGINEERING, SOCIETY, AND BUSINESS ORGANIZATION
UNIVERSITY OF TUSCIA

VITERBO, ITALY

JANUARY 28, 2026

The conference invites researchers to submit an extended abstract (up to **1000 words**) on ecological transition, sustainable development, and related issues. It offers a forum to exchange ideas and discuss the challenges and opportunities of the green transition in developing and emerging economies.

This conference is aimed at researchers interested in ecological transition, sustainable development, and related topics:

- Fiscal sustainability and the Green Transition
- Trade, Technological Dependency, and Global Value Chains
- Industrial policy strategies for a green transformation and external constraints
- Demand-led Growth and Ecological Transition
- Just Transition, Employment, and Inequality
- Climate Change, Debt, and Macroeconomic Resilience
- Political Economy of the Green Transition
- Distributional conflicts and Green Transition

Selected contributions will be considered for publication in *Review of Keynesian Economics (ROKE)*, *ECLAC Review* and *PSL Quarterly Review*

Format: An in-person event
